

ABINASH KUMAR BASA

Odisha, India | +91 8249900305 | abinashbasa15@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Business operations and program professional with experience leading AI and digital training programs, working with government stakeholders, and managing institutional partnerships. M.Sc. in Mathematics and currently pursuing an MBA in Product Management and Generative AI at IIT Patna, with a focus on data, AI, and product management.

EDUCATION

IIT Patna MBA, Product Management & Generative AI	2026–2028
Lovely Professional University M.Sc. Mathematics	2024–2026
MPC Autonomous College B.Sc. Mathematics	2021–2024

PROFESSIONAL EXPERIENCE

Basa Academies Universal Private Limited Business Operations & Program Lead	Apr 2024 – Present
- Led AI, robotics, digital literacy, and academic training programs, including a government pilot project spanning 5 schools - Delivered an AI tools and digital productivity workshop for 50+ government officials at a District Collector's Office - Directed digital literacy initiatives for 30+ Self-Help Group (SHG) members and student training programs reaching 100+ students - Coordinated internship, skill-development, and institutional training programs across schools, colleges, and government stakeholders	

PROJECTS

Statistical & Machine Learning Approaches for Medical Insurance Cost Prediction Python
- Applied statistical testing (t-test, ANOVA, Pearson correlation, multiple linear regression) and compared five ML models. - Identified Gradient Boosting as the top performer ($R^2 = 0.878$, RMSE = 4352.54, MAE = 2447.95) among Linear Regression, Decision Tree, Random Forest, and SVR
Customer Churn Prediction Python, Pandas, NumPy, Scikit-learn
- Built a classification model to predict customer churn following data cleaning, exploratory analysis, and feature preparation - Evaluated model performance using classification metrics and translated key churn drivers into practical retention recommendations
Sales & Customer Analytics Dashboard SQL, Microsoft Excel, Power BI
- Extracted, cleaned, and analyzed sales and customer data using SQL and Excel, then built an interactive Power BI dashboard - Tracked business KPIs including revenue, sales volume, and customer and regional trends through business-oriented visualizations
Mathematical Model for Sleep Quality via Recovery Rate Dynamics Differential Equations, Numerical Methods
Formulated and analytically solved a differential equation modelling sleep recovery via exponential decay; applied Euler's method to simulate recovery trajectories across parameters

CERTIFICATIONS

- Data Fundamentals | IBM SkillsBuild | 2026
- Getting Started with Generative AI | IBM SkillsBuild | 2026
- SQL (Intermediate) | HackerRank | 2026

TECHNICAL SKILLS

Data & Analytics: SQL, Python, Pandas, NumPy, Statistical Analysis, Data Visualization, Microsoft Excel, Power BI

Machine Learning & AI: Scikit-learn, Regression, Classification, Decision Trees, Random Forest, Gradient Boosting, Generative AI Fundamentals

Business & Operations: Program Management, Business Operations, Stakeholder Management, KPI Analysis

Mathematics: Mathematical Modelling, Differential Equations, Statistical Modelling
